

# Problem EXPRESSIONS: Expressions

Let  $X$  be the set of *correctly built parenthesis expressions*. The elements of  $X$  are strings consisting only of the characters '(' and ')'. The set  $X$  is defined as follows:

- an empty string belongs to  $X$
- if  $A$  belongs to  $X$ , then  $(A)$  belongs to  $X$
- if both  $A$  and  $B$  belong to  $X$ , then the concatenation  $AB$  belongs to  $X$ .

For example, the following strings are correctly built parenthesis expressions (and therefore belong to the set  $X$ ):

- $() (()) ()$
- $((()) (()))$

The expressions below are not correctly built parenthesis expressions (and are thus not in  $X$ ):

- $((())) (()$
- $() ( (()$

Let  $E$  be a correctly built parenthesis expression (therefore  $E$  is a string belonging to  $X$ ).

The *length* of  $E$  is the number of single parenthesis (characters) in  $E$ .

The *depth*  $D(E)$  of  $E$  is defined as follows:

$$D(E) = \begin{cases} 0 & \text{if } E \text{ is empty} \\ D(A) + 1 & \text{if } E = (A), \text{ and } A \text{ is in } X \\ \max(D(A), D(B)) & \text{if } E = AB, \text{ and } A, B \text{ are in } X \end{cases}$$

For example, the length of  $'()()()'$  is 8, and its depth is 2.

What is the number of correctly built parenthesis expressions of length  $n$  and depth  $d$ , for given positive integers  $n$  and  $d$ ?

## Input

Input consists of lines of pairs of two integers -  $n$  and  $d$ , at most one pair on line,  $2 \leq n \leq 300, 1 \leq d \leq 150$ . The number of lines in the input file is at most 20, the input may contain empty lines, which you don't need to consider.

## Output

For every pair of integers in the input write single integer on one line - the number of correctly built parenthesis expressions of length  $n$  and depth  $d$ .

### Sample Input 1

```
6 2
300 150
```

### Sample Output 1

```
3
1
```
